WELCOME

This year's **"WINDOW on Ottawa"** offers an excellent technical program and opportunity to connect with utility managers and government decision makers.

This Event is frequently cited by our members as one of the most valuable Conferences they attend each year. This is not only because of the high quality of the technical program but also because it's a fantastic place to meet and network with your peers across the country.

4:15	Wrap-up

ABOUT THE CWWA

The Canadian Water and Wastewater Association (**CWWA**) was established in 1986 to represent the common interests of Canada's municipal water and wastewater systems to federal and interprovincial bodies with respect to policies, programs, national codes, standards and legislation. CWWA's membership has expanded to include other than municipal systems, giving our members an even stronger voice in Ottawa.

Much of the progress and success can be attributed to the initiatives of its founding members. The opportunities and support provided by both Health Canada and Environment Canada have been instrumental in the conduct of major CWWA programs. These have focused on the emerging water/ wastewater management challenges evolving from growing public concerns.
