RE: Metribuzin in Drinking Water: Guideline Technical Document for Public Consultation

CWWA's Drinking Water Quality Committee reviewed the proposed guidance on Metribuzin in Drinking Water.

The Committee fully supports the proposed Guideline. Our members reported extremely low levels in both groundwater and surface water, well below the proposed guidance. As always we appreciate the extensive review of available scientific information and treatment options provided in the Guideline.

Thank you for your consideration

Kara Parisien,  
Sent on behalf of the Canadian Water and Wastewater Association Drinking Water Quality Committee
