

## **Project Manager, Stormwater Planning**

**Full-time temporary position with Hamilton Water—Hamilton, ON**

If you're an experienced Engineer with a background in Storm Water Management and experience with storm drainage infrastructures and management facilities, this is a unique opportunity to make a major contribution to the **City of Hamilton**.

Reporting to the Senior Project Manager, Waste/Wastewater Planning, you'll provide leadership in a team environment that focuses on providing the Watershed Management planning for the City's growth and redevelopment. As you assume the day-to-day responsibilities for the Watershed Management planning elements of the Infrastructure and Source Water Planning Group, you'll ensure all Watershed Management planning activities are delivered in accordance with City, Provincial and Federal guidelines in a cost-effective, efficient and timely manner. You'll also aid in the preparation of sectional reports identifying how the operation performed against established benchmarks related to services, financial, administration, and staff performance.

An excellent communicator with a high level of personal integrity, you'll participate in multi-disciplinary teams to address development, redevelopment, permitting and environment issues, and interact with consultants on Watershed Management planning and functional design projects. You'll also be responsible for investigating and recommending new procedures for improving the section's technical performance. In addition to extensive experience and expertise, you possess a demonstrated record of technical and budgeting competencies, customer focus, and staff delegation and empowerment.

### **QUALIFICATIONS**

**Your qualifications as a Project Manager, Stormwater Planning include:**

- Proven demonstrated knowledge of the theories and practices of Storm Water Management, usually acquired by obtaining a degree or diploma in Civil or Environmental Engineering or a relevant discipline or a combination of relevant education and work experience.
- Membership of, or eligible for certification with, respective professional associations, i.e., Ontario Association of Certified Engineering Technicians and Technologists, or registration as a Professional Engineer in the Province of Ontario preferred.
- Previous experience in the preparation of Watershed and Sub-watershed studies and Master Drainage Plans.
- Previous experience in the analysis and design of storm drainage infrastructures/stormwater management facilities and preparation of stormwater management reports.
- Working knowledge of economic and financial analysis and experience in research and development.
- A thorough understanding of Integrated Master Planning principles and the environmental assessment process gained through extensive practical experience.
- Previous experience in applying for and securing permits and approvals.
- Experience in multi-year capital budgeting, land acquisition and acting as a technical expert.
- Highly developed ability to articulate a vision to lead and inspire others.
- Highly effective leadership, facilitation, communication, presentation, interpersonal and organizational skills.

- Demonstrated ability to effectively manage a multi-disciplinary staff in a results-oriented environment and in a predominantly unionized environment.
- Demonstrated project management experience.
- Experience in designing and delivering customer focused programs and services.
- Ability to deal effectively with elected officials, representatives of other levels of government, management, peers, staff and the general public.
- Thorough knowledge and understanding of statutes, regulations and by-laws affecting the department/section.
- Knowledge of collective bargaining process.
- Through understanding of hydraulic/hydrological modeling and analysis and stormwater computer software applications.

This CUPE Local 1041 full-time, temporary (up to 24 months) position offers a wage range of **\$51.086 to \$56.762** per hour (based on a 35-hour work week schedule).
