

Career Opportunity

Waterworks Manager

Environmental Services Department

Competition Number 2021-16

Are you looking for a great place to work that offers a manageable work-life balance?
Then the City of Yorkton is the place for you!

Yorkton is a growing, vibrant, and progressive community serving as a main-centre hub for numerous surrounding communities. Yorkton is located in the beautiful Parkland Region, and its close proximity to many lakes, golf courses, ski hills, snowmobile trails etc. make it an ideal year round location to reside. Due to its large trading area, Yorkton has many large city amenities and yet provides the quality of life of a smaller community.

As a key member of the City of Yorkton's Environmental Services team, the **Waterworks Manager** will directly report to the Assistant Director of Environmental Services. This position is responsible for overseeing all aspects of the City of Yorkton's Class IV Wastewater and Class III Water Treatment Plant. On an as needed basis this position will also provide coverage for the operations of the solid waste and landfill operations.

- Monitoring landfill, water and wastewater plants
 - equipment operations
 - supervise analytical laboratory work and data for operations and quality control
 - participate in negotiating permits to operate and approvals with government departments
 - work with government officials on collection and reporting of data
 - participate in collecting and computing data for other agencies
- Knowledge of plant operations including SCADA system processes and equipment maintenance.
- Experience in managing complex environmental projects related to Water and Wastewater.
- Coordinating and directing all communications with regulatory agencies, businesses, contractors, consultants, private and public groups as it relates to Water, Wastewater and Landfill regulations.
- Coordinating with federal, provincial and municipal governments, rural municipalities, profit and non-profit organizational groups as it relates to Water and Wastewater operations.
- Identifying and directing appropriate actions to respond to environmental requirements or incidents and creating programs to minimize environmental liabilities and ensure compliance.
- Construction experience, reviewing construction drawings and the ability to work with consultants, is a definite asset
- Supervise, train and mentor staff on the operations and maintenance of the waste water treatment plant lift stations, water treatment plants, wells and well fields, water tower, reservoirs, landfill and associated works
- Knowledge and ability to develop and implement health and safety programs that comply with OH&S safety standards.
- Fostering positive communication with staff, other city departments, contractors, and citizens.

Qualifications

- A degree or diploma in Civil or Environmental Engineering/technology or related post-secondary education in Environmental Sciences, or equivalent.
- At least Five (5) years' experience with at least three (3) years at the management level.
- Extensive knowledge of water and wastewater treatment operations and processes related to water and wastewater treatment.
- Saskatchewan Class 4 in Wastewater Treatment certification and Class 3 in Water Treatment certification is preferred
- Proficient with Safe Drinking Water Act, The Waterworks and Sewage Works Regulations, Health and Safety, and other related legislation.
- Possess and maintain a valid Class 5 Saskatchewan Driver's license and RCMP security clearance

Salary: The City of Yorkton offers a competitive compensation package, which includes Benefits and Pension

Interested applicants are invited to apply online at www.yorkton.ca.
