

Make working for  
The City work for you.

## Maintenance Engineer

If you are committed to public service, enjoy collaborating with others, share our values and have a desire to learn and grow, join [The City of Calgary](#). City employees deliver the services, run the programs and operate the facilities which make a difference in our community. We support work-life balance, promote physical and psychological safety, and offer competitive wages, pensions, and [benefits](#). Together we make Calgary a great place to make a living, a great place to make a life.

The City is committed to fostering a respectful, inclusive and equitable workplace which is representative of the community we serve. We welcome those who have demonstrated a commitment to upholding the values of equity, diversity, inclusion and anti-racism. Applications are encouraged from members of groups that are historically disadvantaged and underrepresented. Accommodations are available during the hiring process, upon request.

As the Maintenance Engineer, you will be tasked with planning, coordinating, and scheduling major asset maintenance and rehabilitation activities in order to support the delivery of reliable Wastewater Treatment Plant operations. Primary duties include:

- Improve the cost effectiveness of plant maintenance and rehabilitation operations and extend the service life of plant assets.
- Provide plant maintenance engineering and asset management technical support for wastewater treatment plant operation and maintenance.
- Research, develop, implement and help in the understanding of asset management concepts.
- Review and maintain asset life cycle profiles for key assets, analyzing historical asset performance, and developing long-term asset rehabilitation requirements.

### Qualifications

- A degree in Engineering.
- Registration as a Professional Engineer in Canada, and current licensure as a Professional Engineer with the Association of Professional Engineers and Geoscientists of Alberta (APEGA) by the first day of work.
- At least 4 years of relevant P.Eng experience in maintenance management, and asset rehabilitation is required.
- A valid Class 5 Driver's Licence (or provincial equivalent) or a Graduated Driver's License (GDL) and access to a personal vehicle for business use is required.
- Knowledge of asset life cycle management and predictive maintenance techniques will be considered assets.
- Project management experience will be considered an asset
- You are an excellent communicator, who works effectively within a group setting.
- You demonstrate strong analytical skills and the ability to identify and research new industrial trends and technology.

**Working Conditions:** This position works in a Wastewater treatment plant, where Personal Protective Equipment (PPE) is required.

### Pre-employment Requirements

- Successful applicants must provide proof of qualifications.
- Effective November 1, 2021, all City of Calgary employees must be fully vaccinated against COVID-19. For more information, please refer to the [COVID-19 Vaccination Policy](#).
