The Regional District of Nanaimo (RDN) is situated within the traditional territory of several First Nations, including three that have reserves within the region: Snuneymuxw, Snaw-Naw-As and Qualicum. The RDN recognizes the rich cultural history of these First Nations and is committed to developing positive working relationships to the benefit of all residents of the region.

ORGANIZATIONAL PROFILE

The RDN is one of 27 regional districts in the Province of British Columbia. Regional Districts across the Province strive to ensure all provincial residents have an effective form of local government, while also representing municipal residents on regional issues.

The RDN provides regional governance and services to the municipalities of Nanaimo, Lantzville, Parksville, and Qualicum Beach, as well as seven unincorporated Electoral Areas. Established in 1967, the RDN is British Columbia's fifth most populous Regional District and home to more than 155,000 people.

The RDN is governed by a 19-member Regional Board, comprised of 12 directors from locally-elected municipal councils, and seven directors elected by Electoral Area residents. Board members also sit on a variety of regional select and standing committees for key services, as well as the RDN Committee of the Whole.

ABOUT THE ROLE

Reporting to the Director, Water and Wastewater Services, the Process Engineer will be responsible for the development, implementation, management, and coordination of plans, policies, programs, and engineering designs. The Process Engineer contributes to supporting the effective and efficient operation and maintenance of treatment facilities and processes to meet current and future requirements. This position will have a focus on optimizing operational processes, meet service expectations, departmental goals, and objectives.

The ideal candidate will have an undergraduate degree in Environmental or Chemical Engineering, or a related field, plus a minimum of six (6) years' prior related experience in water/wastewater process engineering preferably in a municipal wastewater treatment facility. Process design, optimization and operational experience in water and wastewater treatment plants, pump stations, and conveyance systems preferred. A valid Class 5 BC Driver's License is required.

The salary range for this role is: \$105,000 – 110,000.

CONTACT DETAILS

The RDN is committed to employment equity, and welcomes diversity and encourages applications from all qualified individuals. Should you be interested in learning more about this unique opportunity with RDN, please contact Harbour West Consulting at 604-998-4032 or forward your resumé, a letter of introduction and the names and contact information for three references, in confidence, to info@hwest.ca.
