TO APPLY

Letter of introduction & resume via email to Harbour West Consulting.

Metro Vancouver acknowledges that the region's residents live, work, and learn on the shared territories of many Indigenous peoples, including 10 local First Nations: Katzie, Kwantlen, Kwikwetlem, Matsqui, Musqueam, Qayqayt, Semiahmoo, Squamish, Tsawwassen, and Tsleil-Waututh.

ORGANIZATIONAL PROFILE

Metro Vancouver is a federation of 21 municipalities, one Electoral Area and one Treaty First Nation that collaboratively plans for and delivers regional-scale services like drinking water, wastewater treatment and solid waste management. The regional district also regulates air quality, plans for urban growth, manages a regional parks system and provides affordable housing.

The Regional District model allows municipalities, electoral areas and Treaty First Nations to collaborate on infrastructure, service delivery, land use planning and more, as needed by the region's communities. This way, local governments can pool their resources to take advantage of economies of scale and regional leverage. Metro Vancouver is B.C.'s most populous and metropolitan regional district.

ABOUT THE ROLE

Reporting to the Supervisor, Water Treatment Operations, the Water Treatment Operator collaborates with the Water Services Department team to operate and maintain the Seymour Capilano Filtration Plant and deliver clean, potable, and safe drinking water to the residents of Metro Vancouver. The position is responsible for inspecting, monitoring, controlling, and maintaining all aspects of the facilities, while contributing to a culture of accountability, collaboration, and innovation. This is an incredible opportunity to support the state-of-the-art and highly automated Seymour Capilano Filtration plant, one of the biggest water treatment facilities in Canada. This position affords the opportunity to contribute across, improvement projects and initiatives with opportunities for advancement.

The ideal candidate will have graduated from a two-year Water Engineering Technology education program or related discipline (i.e., environmental sciences, environmental or chemical technology) along with a British Columbia EOCP Level I or II Water Treatment Operator Certification or equivalent Provincial certification. The successful candidate will have excellent problem-solving skills with the ability to develop effective working relationships required to optimize resources and support organizational priorities and service delivery.

The salary range for this position is \$89,495 per annum plus 6.25% deferred compensation and is accompanied by an attractive benefits package.
