## TO APPLY

Letter of introduction & resume via email to  
Harbour West Consulting.

Metro Vancouver acknowledges that the region's residents live, work, and learn on the shared territories of many Indigenous peoples, including 10 local First Nations: Katzie, Kwantlen, Kwikwetlem, Matsqui, Musqueam, Qayqayt, Semiahmoo, Squamish, Tsawwassen, and Tsleil-Waututh.

## ORGANIZATIONAL PROFILE

Metro Vancouver is a federation of 21 municipalities, one Electoral Area and one Treaty First Nation that collaboratively plans for and delivers regional-scale services like drinking water, wastewater treatment and solid waste management. The regional district also regulates air quality, plans for urban growth, manages a regional parks system and provides affordable housing.

The Regional District model allows municipalities, electoral areas and Treaty First Nations to collaborate on infrastructure, service delivery, land use planning and more, as needed by the region's communities. This way, local governments can pool their resources to take advantage of economies of scale and regional leverage. Metro Vancouver is B.C.'s most populous and metropolitan regional district.

## ABOUT THE ROLE

Reporting to the Superintendent, Field Operations, the Supervisor, Field Operations (Water) is part of the supervisory team responsible for managing the field-based operations of the region's drinking water supply system. The water supply system consists of over 520 km of large diameter water mains, 19 water pump stations, 26 water storage reservoirs, and 5 dams. This role supervises operations and operational maintenance activities required to ensure reliable performance of water transmission and oversees the use of a wide variety of equipment and technologies.

The ideal candidate will bring an understanding and knowledge of the methods and objectives of water distribution operations and operational maintenance for a large-scale municipal or regional service provider, including experience managing an operations team in water transmission/distribution. The successful candidate will have a diploma (or university degree) in a relevant discipline such as public works, sciences, or engineering. Certification in water distribution (EOCP Level 3 Water Distribution is an asset). Recent, related experience leading and managing a team. An equivalent combination of education, training and experience may be considered. A valid BC Class 5 Driver's License is required.

*The salary range for this position is \$101,830.59 - \$119,758.95 per annum and is accompanied by an attractive benefits package.*
